

## Focus areas of the Working Group for the period up to 2028

### Financing for sustainable development

1. Developing the infrastructure and instruments for the sustainable finance market, taking into account the priorities of the Russian Federation's national projects, including national projects that contribute to the achievement of the SDGs

### Corporate governance and information disclosure

1. Enhancing corporate governance principles related to sustainable development at public joint-stock companies and financial institutions and assessing their compliance
2. Developing approaches to sustainability disclosure, including in terms of preparing machine-readable reporting

### Assessing risks related to sustainable development and incorporating them into financial market regulation

1. Assessing the impact of climate risks on major Russian exporters and the financial sector
2. Improving financial institutions' approaches to analysing climate risks and integrating such risks into their activities
3. Improving the availability of data needed by financial institutions to analyse climate risks
4. Developing approaches to incorporating climate risks into regulation

### Integrating sustainable development principles into the Bank of Russia's operations

1. Integrating sustainable development principles and climate risks into the Bank of Russia's operations
2. Cascading the priorities of the Bank of Russia's sustainable development policy to its subsidiaries

### International cooperation

1. Sharing experiences and aligning approaches with partner countries on sustainable development issues
2. Promoting the Russian Federation's interests in international fora, including BRICS, the EAEU, the G20, the UNFCCC COP, APEC, and the SCO
